ME Engineers Opens Office in Doha, Qatar

DOHA AIRPORT

ME Engineers is expanding their operations in the Middle East with a new MEP/ICT engineering design office in Doha, Qatar. The firm's strategic decision is an extension of their commitment to best service major projects across the globe.

The firm is currently on the HOK/Parsons design team for the \$23B New Doha International airport in Qatar, and is concluding value engineering for the design development of the \$18B Abu Dhabi airport with CCC, as well as for the value engineering on the CCC/RTKL team for the King Faisal Special Hospital and Research Center, in Jeddah KSA.

ME Engineers has successfully delivered over 70 stadia and arenas worldwide and is positioned on teams for the Management of the 2022 World Cup program in Qatar, as well as the design of the transformer soccer stadium , the tennis stadium and the garraffa aquatics and arena.

The office will be led by Dr. Toufic Hawat. With over 20 years of experience in special systems design for high performance construction projects, Dr. Hawat has managed projects worldwide including cooperation with firms in Europe, the Middle East and the USA.

ME Engineers is a global engineering design firm with a 30-year history of success that includes some of the most recognized buildings in the world. The firm has an extensive sustainable design portfolio and has completed more than 125 LEED Certified projects over the past 5 years.
